Career Discovery in Fashion & Textiles

Wednesday 5 - Thursday 6 July 2017

The course to assist you in selecting the most appropriate program & career option

The global environment in which the Australian Fashion and Textile industries operate requires graduates with contemporary and adaptable skill sets.

You may love the idea of working in this dynamic, exciting and ever-changing industry and would like to discover how it may suit you. This could be as a creative designer with your own business through to managing a large-scale retail operation.

You will engage in practical hands-on activities during four workshops associated with the Programs outlined overleaf. Work produced may be suitable for inclusion in your portfolio.

During the workshops and whilst being taught by industry experts, discussion topics may include:

- Trend Forecasting
- Fashion Creative Processes and Ideas Generation
- Visual Merchandising
- Digital Technologies
- Off-shore Manufacturing and Procurement
- Textile Design and Development
- E-tailing

For enquiries and enrolments visit RMIT Short Courses:

Career options associated with the Fashion and Textile industry are diverse and multi-faceted. As Australia’s premier provider of education and training to this industry sector, RMIT University’s School of Fashion and Textiles is acutely aware of the skills and knowledge required by graduates to participate and positively contribute in today’s highly competitive marketplace.

Accordingly, the educational programs and pathways servicing this industry and the skills and knowledge they provide are specifically varied in content and focus.

The prevalence of off-shore manufacturing requires skills in logistics, digital design and specification development.

Rarely a month passes without another international retailer confirming it is preparing to venture down under. Skills and knowledge related to e-tailing, merchandising and marketing are required in order to compete and remain competitive and viable.

Advances and innovations in fibre, textile and garment functionality require designers with the knowledge to adapt and utilise these technologies to create apparel for the 21st century.

Workshops may include:

- Textile exploration and screenprinting
- Developing a visual diary
- Engaging in the design process
- Footwear design exploration through drawing

University experts will provide advice and information on the following RMIT University Programs:

- Bachelor of Arts (Textile Design)
- Bachelor of Design (Fashion) (Honours)
- Associate Degree in Fashion and Textile Merchandising
- Associate Degree in Fashion Design and Technology
- Diploma Textile Design and Development
- Diploma of Fashion Styling
- Certificate IV in Custom Made Footwear

Who Should Attend:
The course is designed for Year 11/12 and mature aged students wanting to gain an informed insight into Fashion and Textile future study options.
