Description
Flexographic printing is currently Australia’s fastest growing printing process. This course provides participants with an overview of the flexographic printing process in a practical setting with hands-on experience and tuition by experienced staff trainers. Participants will be introduced to a number of different flexographic printing machines and evaluate the different uses including the Mark Andy flexographic label printer as well as larger machines.

Content
The course will cover topics including:

- Examining inking methods and control
- Plate mounting and proofing techniques
- Quality control systems
- Ink colour mixing and matching
- Printing on a variety of substrates
- Printing trouble shooting

Outcome
Participants will acquire a solid understanding of the flexographic printing process and it’s applications and how it compares and differs to other processes.

Suited to
This course is aimed at persons directly involved in printing or who those who buy/supply to the flexographic industry.

Course Presenter
Ross Hall is a full time staff member at RMIT Centre of Graphic Technology and has extensive professional experience in the flexographic printing industry.

Materials supplied
Course notes and all materials supplied.

Materials to bring
Pen and Paper.

Award
Participants will be awarded an RMIT Statement of Participation.

Additional notes
Daytime courses can be arranged on application.
