Description
Are you keen on computers, web design and multimedia? In this introductory folio course you get to use a range of current software programs such as Dreamweaver, Flash and Adobe CS4 to work on your own practical project for web design with teacher guidance to produce finished graphic material including a simple animation and a web page. Practical exercises are followed by class discussion to highlight methods and solutions. This is an ideal course for VCE students or adults interested in further study or information on employment in the Printing Technology and Graphic Arts Industry.

Content
- Introduction to computer programs
- Projects for web
- Industry and study information
- Presentation of work

Pre-requisites:
None, just an interest.

Outcome
Students are guided through the contents via demonstrations and practical exercises. Students complete projects and exercises to take away.

Suited to
This course is for students wishing to gain knowledge connected to multimedia. It is suitable as an introduction for students interested in further studies in this field. This course will suit mature age students without previous art/design experience, as well as VCE students wishing to develop a better understanding of multimedia.

Course Presenter
Murray Chapman is an experienced professional graphic artist and freelancer and a part time member of the staff at RMIT.

Materials to bring
A notebook and pen, media such as a memory stick for transporting finished files to home.

Award
Participants will be awarded an RMIT Statement of Participation.

Additional notes
Participation has no influence on the selection of students into RMIT award programs. Short Course activities may include opportunity to prepare for a folio, experience of the studio environment, provide an industry and study overview, and assistance with study options.
